

TopBrewer Slimline Coffee Point Wall Cabinet

TopBrewer 

We create reassuring, personalised, design-led coffee experiences with inbuilt technology that allows users to connect, customise and brew barista-quality coffee without the need to touch.

Trust TopBrewer to help you create a safe and comfortable environment that staff and guests will thank you for. With our range of mobile, pop-up solutions you can alleviate pressure on busy breakout areas to improve social distancing.

Promote a safer environment with our new minimal and discreet TopBrewer Slimline Coffee Point. The wall hanging unit is ideal for creating a self-contained, touch-free coffee facility where space is at a premium, yet style, output, and hygiene are paramount. The slimline footprint takes up minimal wall/floor space and is available with either TopBrewer Pro or Compact models.

The built-in TopBrewer coffee machine is controlled with an app, meaning consumers can safely connect to the machine to customise and brew a coffee safely and at a distance - touch-free.

Minimal footprint. Maximum reassurance.

Touchless coffee. Enjoy your favourite coffee at a safe distance with the TopBrewer phone app

One tap for all. Combine barista coffee, steaming hot water and hot chocolate in a streamlined coffee point

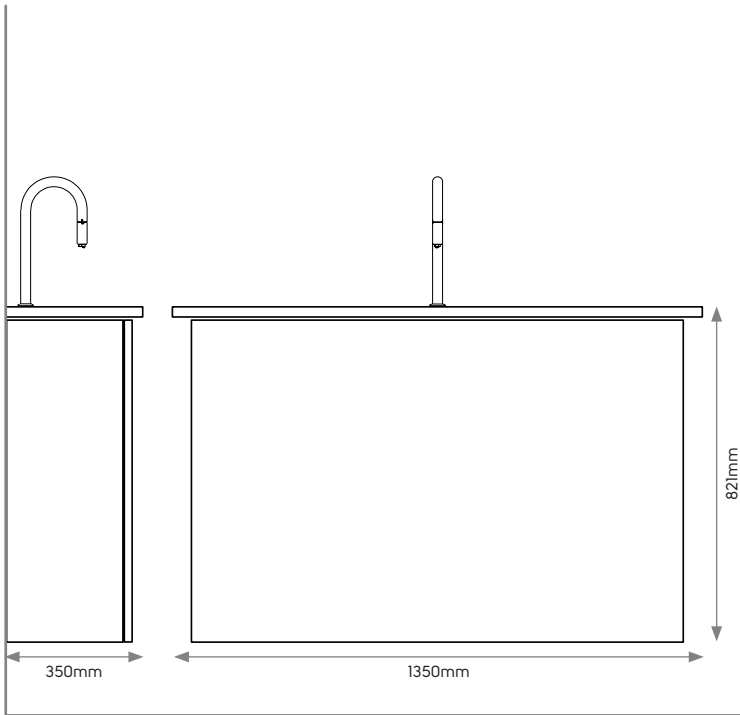

99% safely under the counter. Reduce surface contact with just the swan neck visible. Super easy to keep clean.

Remote diagnostics. CoffeeCloud enables remote monitoring and troubleshooting to reduce support visits.

Notifications. Operational alerts for cleaning and filling aids social distancing and improves efficiency.
